EXPERIENCE

Front-end developer, Nickelfox, Noida

MARCH 2018 - MARCH 2020

Worked in the frontend team of 5. Executed several projects single-handedly using React, Javascript, HTML, and CSS technologies. Collaborated within the team and with cross-functional teams to deliver the best quality products for the clients.

Front-end developer, Freelancing

SEPTEMBER 2017 - FEBRUARY 2018

Handled several web projects with multiple clients using HTML, JS and CSS technologies.

EDUCATION

B. Tech Information Technology(IT)

SEPTEMBER 2009 - JULY 2013

Poornima College of Engineering, Jaipur

PROJECTS

Aptihealth

Aptihealth is a behavioral healthcare company working in b2c space.
I worked on the consumer, doctor and internal application and developed features like onboarding, booking flow, video calling, scheduling using React/Redux, and integrated with the backend APIs.

Rating Finder

This Extension for Netflix, displays IMDB's rating of movies on thumbnail image. Built the whole extension single handedly as a side project.

PoweredX

PoweredX is a free program that allows entrepreneurs to get their tech-based ideas developed up to MVP level. I built the website end to end from scratch as an SPA using technologies HTML/CSS and Vanilla JS.

Aviteur

Aviteur (a subsidiary of Gucci) is an e-commerce website specialising in luggage bags. I worked on the web application which was built using Liquid template language and Shopify.

Neobeema

Neobeema aims to transform customer experiences in the insurance industry. I developed the whole web application from scratch using React and Vanilla JS.

Scoperworker

Scopeworker is an enterprise B2B marketplace. I worked on various static and dynamic components across the website.

Nickelfox Portfolio and Blog

Worked on the company website and blog and developed various pages and components using HTML/CSS, Vanilla JS and custom Wordpress theme.
